About Us

Metro Brass Products: 31 Years of Precision Engineering, Shaping the Future of Power

Metro Brass Products has been a leader in the power transformer industry since 1993, providing top-quality brass and copper components. Our commitment to excellence is evident in our unwavering focus on quality, timely deliveries, and customer-centric approach. With a dedicated team and state-of-the-art facility, we ensure flawless performance and reliability in every component. Partner with us and experience the difference in precision engineering.

Our Core Values

Unwavering Quality:

We uphold the highest industry standards, ensuring that every component meets stringent quality control measures for flawless performance and longevity.

Timely Deliveries:

We prioritize efficient production and logistics to minimize downtime and project delays, delivering your parts when you need them most.

Customer-Centric Approach:

We listen to your needs and provide tailored solutions, backed by expert advice and support from our dedicated team.

VISION

To be the globally recognized leader in high-quality brass and copper components for power and distribution transformers, empowering our customers to build more reliable, efficient, and sustainable electrical infrastructure.

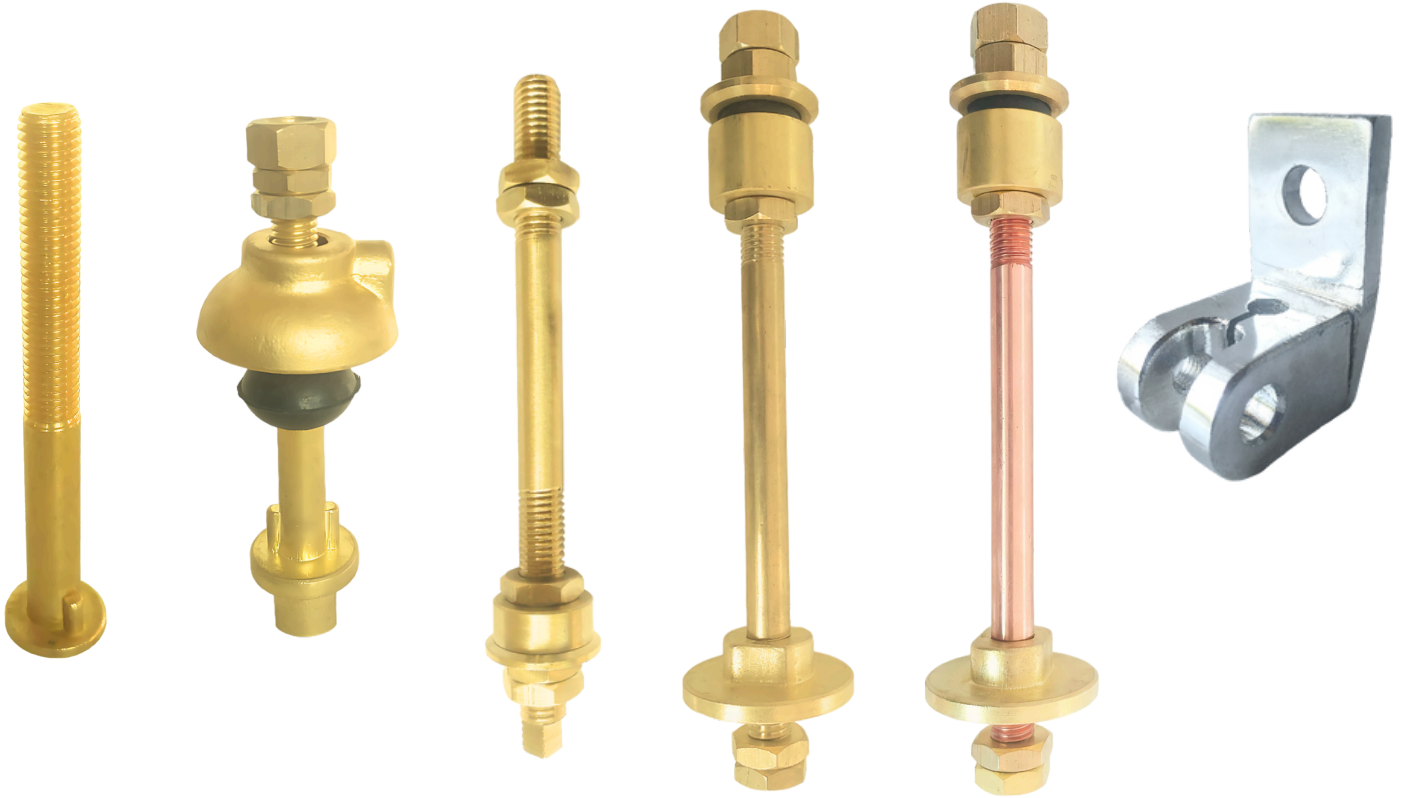

MISSION

With 31 years of expertise, we specialize in crafting precision brass and copper components for power and distribution transformers. Our focus on quality ensures optimal performance and durability. As a trusted partner, we offer innovative solutions, excellent service, and competitive pricing.

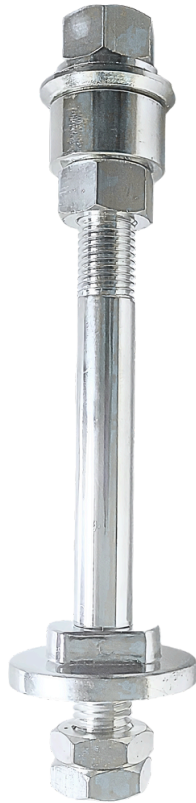

M12 HV & LV Metal Parts With Accessories As Per IS Standard And Non IS

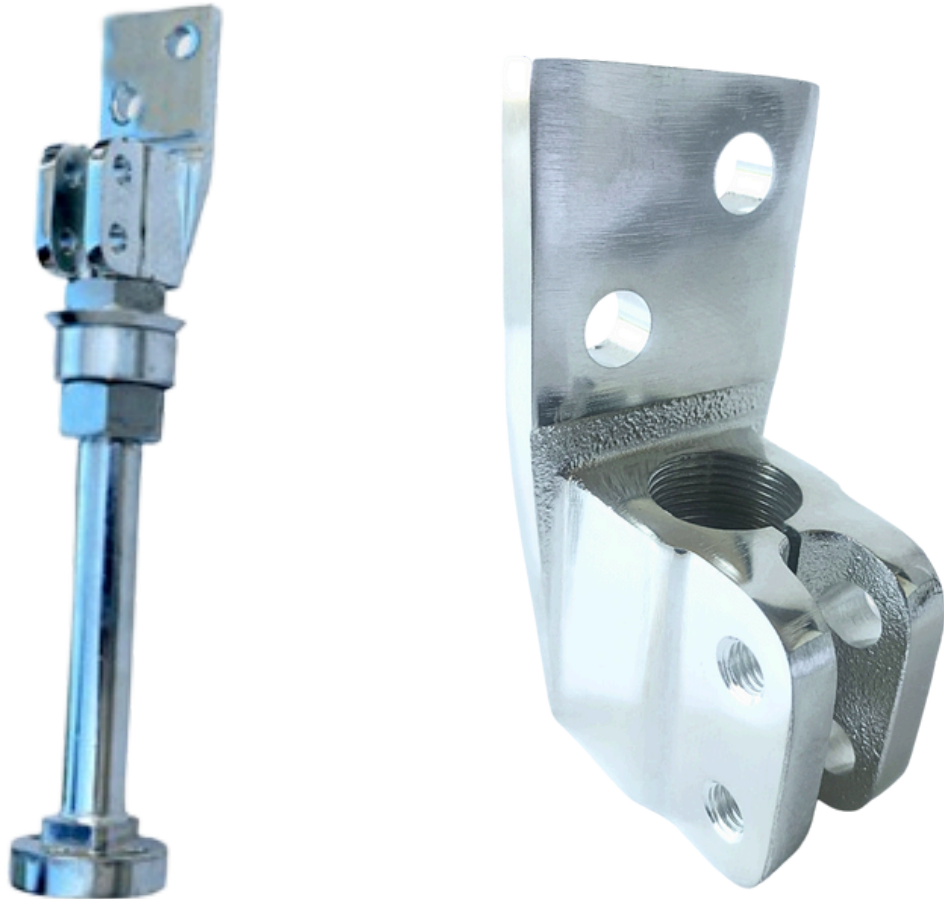

Material	Premium Brass And Copper Alloy As Per IS Standard
Finishing & Coating	<ul style="list-style-type: none">• Natural brass• electro-tin plating• custom options offer flexibility to match your project requirements and environmental conditions

M20 HV & LV Metal Parts With Accessories As Per IS Standard And Non IS

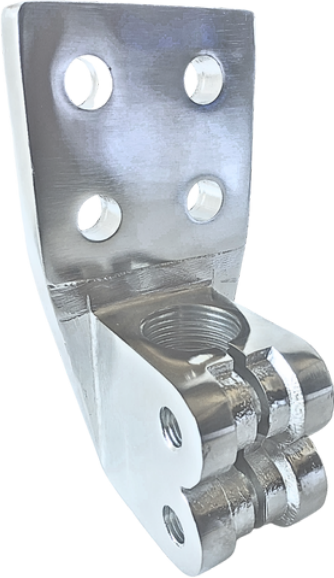

Material	Premium Brass And Copper Alloy As Per IS Standard
Finishing & Coating	<ul style="list-style-type: none">• Natural brass• electro-tin plating• custom options offer flexibility to match your project requirements and environmental conditions

M30 Metal Parts With Accessories

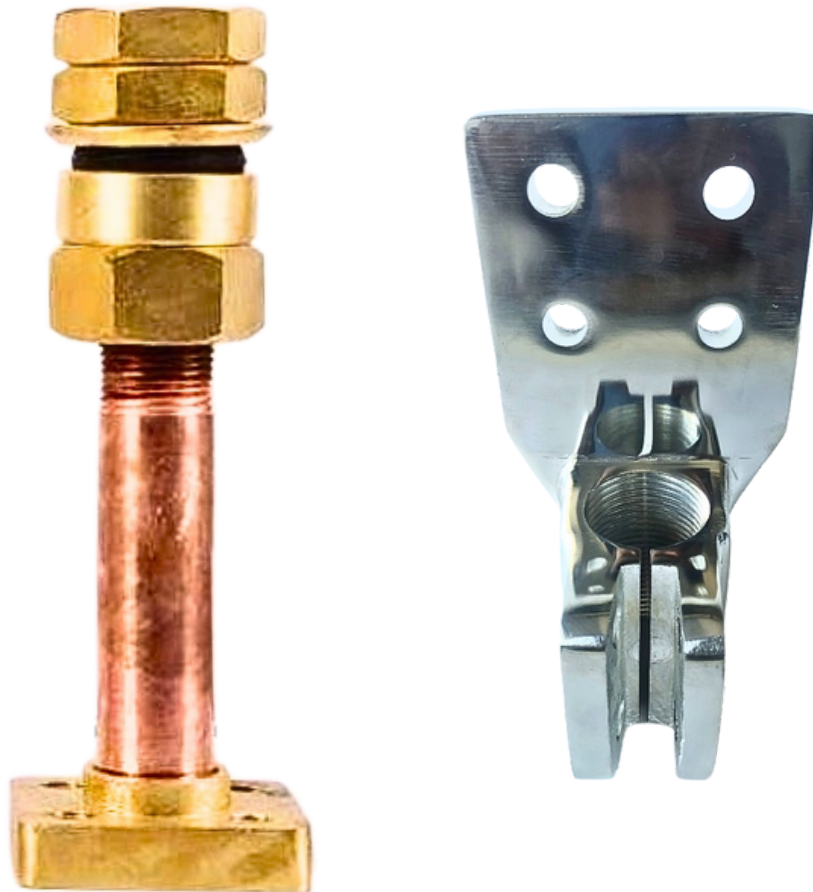

Material	Premium Brass And Copper Alloy As Per IS Standard
Finishing & Coating	<ul style="list-style-type: none">• Natural brass• electro-tin plating• custom options offer flexibility to match your project requirements and environmental conditions

M42 Metal Parts With Accessories

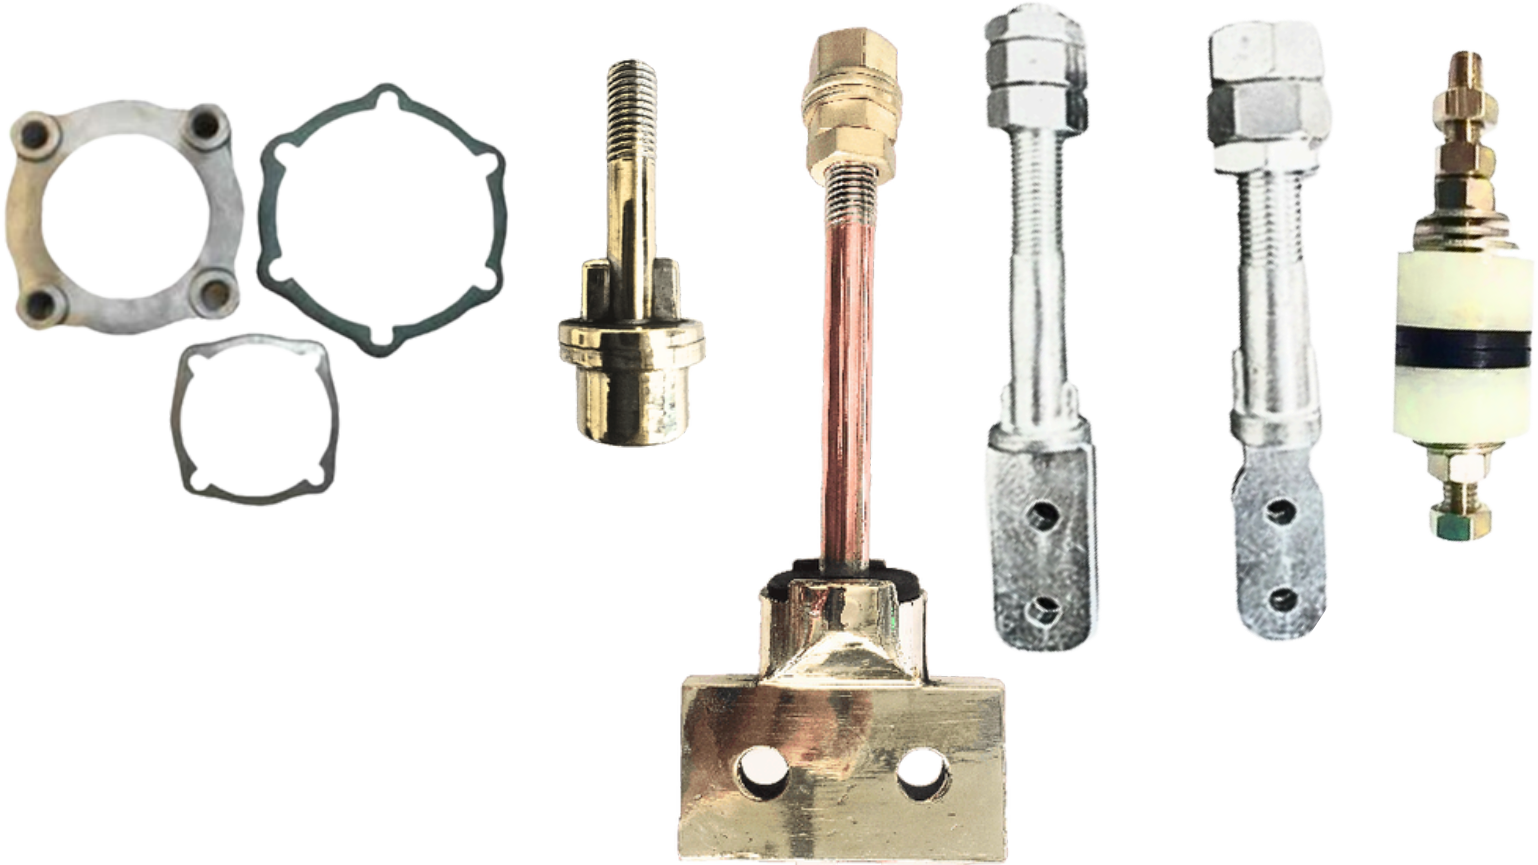

Material	Premium Brass And Copper Alloy As Per IS Standard
Finishing & Coating	<ul style="list-style-type: none">• Natural brass• electro-tin plating• custom options offer flexibility to match your project requirements and environmental conditions

M48 Metal Parts With Accessories

Material	Premium Brass And Copper Alloy As Per IS Standard
Finishing & Coating	<ul style="list-style-type: none">• Natural brass• electro-tin plating• custom options offer flexibility to match your project requirements and environmental conditions
